

STREAMLINE YOUR PROGRAM IMPLEMENTATION WITH A NEW-AGE ROBUST MONITORING, REPORTING AND ANALYSIS TOOL

Powered by mind+machine™

This reporting and dynamic analysis platform enables:

Efficient and Proactive Reporting

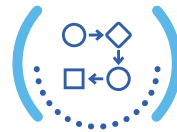

Data Analysis for Quick Responses

Powerful High-End Visualizations

Real-time KPIs and Analysis

Seamless Workflow

Streamlined Data Management

Our Results Based Management (RBM) approach monitors outcomes throughout the whole project lifecycle from initiation to implementation and closure enabling clients to collaborate, build scalable outcome-focused programs, guide future decision-making, and replicate success across the country. Discover how our robust analysis platform identified key enablers and barriers for our client's Rotavirus Vaccination Immunization (RVVI) Program [here](#).

A Results-Based Approach to Project Monitoring, Learning, and Evaluation

Planning Phase

- Assess existing M&E Frameworks
- Establish a results framework (KPIs, Targets, Timeframe)
- Conduct a Baseline Assessment

Implementation Phase

- Real-time data management
- Analytical dashboards, tools, and reports
- Capacity build-up support
- Modeling scenarios of coverage
- Midline evaluations

Post-Implementation Phase

- Post Implementation Evaluation (PIE)
- Measure impact
- Document successes and improvements
- Evidence-based report writing
- Exemplars and case studies
